

## **Health & Safety Solutions**

### ***Client feedback...***

"We have found that since using Advantage Ergonomics Canada Inc. (AEC) for Construction Project Safety Inspections, we have been able to monitor safety issues much more efficiently and effectively. This has also provided much appreciated back-up support for the project supervisors.

By using AEC to develop our Health and Safety Program, we have saved valuable time and have been able to create an easy -to -follow manual, specific to our company needs. "

Doug Roeder, Vice President  
**Nith Valley Construction Ltd.**

"Your office was great to work with and very efficient in organizing the training on short notice. We were appreciative of how flexible you were in accommodating our early morning time. The training was cost effective and convenient - thank you for doing the travelling so we didn't have to! "

Bill Smith, Vice President  
**GranVal Construction Inc.**

"The information and hands-on training provided by AEC was easy to follow, easy to understand and maintained everyone's interest during the sessions.

Your assistance in keeping our Health and Safety Policies updated has been extremely valuable.

From everyone at Grassmere, we wish you continued success and look forward to having you as part of our safety team. "

Lyle A. Ball, C.E.T. General Manager  
**Grassmere Construction Ltd.**

"AEC has been monitoring our construction sites for Health and Safety issues for over 5 years. They send reports to our head office indicating the challenges and successes in the field -this certainly helps us keep our high standards of safety.

It is challenging to stay current with regulations and standards, AEC is the group that we depend on to keep us up-to-date. When we require training in First Aid/CPR, WHMIS, Fall Protection, or Propane handling, we always call Advantage Ergonomics Canada Inc. "

Andy Barzetti, P. Eng. Project Manager
